

Our Philosophy

- We place **children at the centre of our practice** and believe that their voice has a right to be heard.
- We assist children to develop a **strong sense of self** by offering an inclusive, caring, safe and stimulating environment where they are able to explore, play, learn, imagine, have fun, create friendships and be challenged.
- We value our **diverse educators**, their expertise and their ongoing professional development.
- We recognise the various **cultures and heritage** that comprise our community and promote respectful relationships within it.
- We believe in teaching our children about the **natural world**, respecting the environment and working towards developing sustainable practices that are environmentally responsible.
- We value the **contribution parents and carers make to our community** and support them to fulfil their work, study and volunteer commitments.
- As a co-operative centre we believe in **sharing our knowledge and ideas** with each other. We believe that **good relationships between children, staff and families** play a crucial role in the development and wellbeing of children. Effective partnerships with our families are based on **good communication and strong trust** and result in the delivery of a program that reflects the contribution of parents, educators, the community, and most importantly **the children**.
